PRESIDENT'S MESSAGE

FROM THE DESK OF LISA HOLDEN

Kentuckiana ISACA Chapter members and Guests,

I am honored to serve as your president for the 2009-2010 term. The Board of Directors have been meeting during the summer to create and finalize plans and budgets. We are pleased to provide you with a glimpse into the upcoming chapter year.

[Continued on Page 4](#)

Enterprise Vulnerability Management

Speaker: Mark Wood, VP Product Management and Strategy

Topic: This presentation will be conducted by **nCircle**, an industry leader in EVM, and will touch on how to setup and manage a successful enterprise vulnerability management process.

nCircle has a proven track record of innovation in security and compliance auditing. nCircle was the first to deliver a complete [vulnerability and risk management system](#), moving the market beyond simple penetration tests and enabling enterprise customers to focus on security processes rather than simply one-time vulnerability assessments. nCircle has built on that expertise, uniquely delivering a fully integrated, best-in-class agentless product line for auditing the entire information technology stack across a global network.

nCircle is the only provider of a true appliance-based solution, minimizing cost and complexity in enterprise deployment and management, while providing virtually unlimited scalability. nCircle is the only vulnerability and risk management system to be Common Criteria certified at EAL level 3. This is a comprehensive third party certification recognized in 23 countries on the strength of the security processes in the company and the processes around creating and delivering products.

nCircle currently holds five U.S. patents and has another four patents pending. nCircle is the only vendor with a 24-hour SLA for critical Microsoft vulnerabilities, ensuring that within 24 hours of the announcement of the advisory by Microsoft, nCircle will provide a check with which they can test their systems for the vulnerability. nCircle supports this guarantee with the largest and most productive [Vulnerability and Exposure Research Team \(nCircle VERT\)](#) in the industry.

nCircle is the leading provider of automated security and compliance auditing solutions. More than 4,000 enterprises, government agencies and service providers around the world rely on nCircle's proactive solutions to manage and reduce security risk and achieve compliance on their networks. nCircle has won numerous awards for growth, innovation, customer satisfaction and technology leadership. nCircle is headquartered in San Francisco, CA, with regional offices throughout the United States and in London and Toronto.

Speaker Bio:

Mark Wood:

Mark Wood is responsible for product management for the Configuration Compliance Manager business. He has more than 21 years of technology marketing experience, with significant expertise in product management, marketing and new product market strategies. Prior to joining nCircle, Mark was vice president of product management and marketing for Cambia Security, the leader in agentless configuration compliance that was acquired by nCircle in May, 2007. At Cambia, Mark directed product strategy, product marketing and marketing initiatives.

Next Chapter Meeting: 10/29/2009

PRESIDENT'S MESSAGE (CONTINUED)

ISACA Kentuckiana's focus will continue to be on providing current, varied, and relevant educational opportunities. It will also provide forums for sharing and networking. In conjunction with ISACA International, we intend to provide as many opportunities as possible throughout the chapter year for continuing education credits to help you maintain certifications - and to offer them through events that are free or provided at affordable rates.

Other chapter objectives include increasing support for the profession through academic relations, continued focus on certification preparation, professional standards guidance for CobIT, RiskIT and VallT, community service opportunities and improved membership retention and chapter management practices.

We will continue to provide member communications and benefits via our award winning website and through our newsletter. The website is continually updated to provide members benefits on an ongoing basis. Look for a fresh look and useful links to the newsletter, meeting calendar, enhanced registration capability, and information on current offerings such as chapter sponsored seminars, and events provided by cooperating organizations such as ISSA and IIA. The first meeting of the chapter year was held on September 25, 2009 at Bristol Bar & Grille Downtown.

This meeting kicked off our vulnerability management series, which includes web application, virtualization, database and general vulnerability management.

The next meeting in this series is this month's Enterprise Vulnerability Management presented by nCircle. Don't forget to register by Tuesday, October 27th to ensure your meal selection. The lunch meeting schedule will remain the fourth Friday of each month (September through June). The one exception is October 2009, when we will meet on Thursday, October 29, 2009. Please refer to the website for more information in the near future.

I also want to share with you news of the 40th anniversary celebration at the ISACA National Conference events held this spring in Orlando. About 150 chapter leaders celebrated the milestone together with many of the board members and staff of ISACA International. We learned about the new ISACA strategic plan, educational and research offerings from ISACA National, as well as chapter management tools. We plan on having several members attend the ISACA Regional conference later this fall in Nashville. If you are interested in reviewing documentation on ISACA's strategy and offerings, please visit the website at <http://www.isaca.org>.

We look forward to working with International to provide 40 more years of excellent service and benefit to our members. If you are interested in volunteering and joining our outstanding board and volunteer team, please contact me at lholden @ humana.com.

Kentuckiana Chapter Newsletter

Issue 8 - October 2009

Next Exam: December 12th 2009

The Certified Information Systems Auditor (CISA) is ISACA's cornerstone certification. The CISA certification has been earned by more than 55,000 professionals since inception and is for the IS audit, control, assurance and/or security professionals who wish to set themselves apart from their peers. Since 1978, the CISA certification has been renowned as the globally recognized achievement for those who control, monitor and assess an organization's information technology and business systems.

[Learn More about Certification](#)

Next Exam: December 12th 2009

The Certified Information Security Manager (CISM) certification is a unique management focused certification that has been earned by over 7,000 professionals since its introduction in 2003. Unlike other security certifications, CISM is for the individual who manages, designs, oversees and assesses an enterprise's information security program. CISM defines the core competencies and international performance standards that those who have information security management responsibilities must master.

[Learn More about Certification](#)

ISACA's IT Governance Certification

The IT Governance certification is intended to recognize a wide range of professionals for their knowledge and application of IT governance principles and practices. Many CGEIT certificates have been awarded.

[Learn more about CGEIT](#)

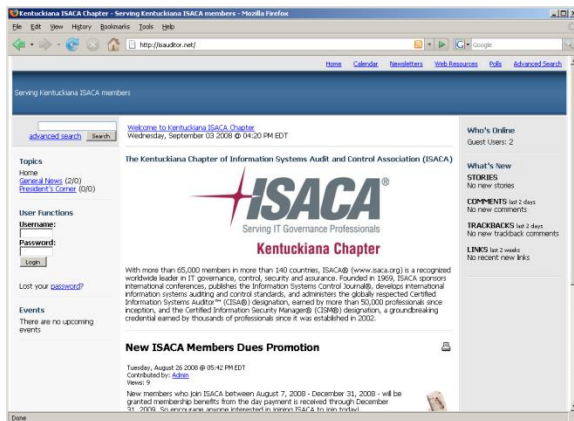

CISA and CISM training is now part of Sullivan University curriculum; please contact meetings@isacaky.org for details.
