Ernie specializes in Network Operating systems and Internet Technology. He has an additional focus on system security.

Approximately half of Ernie's billable time is spent in the classroom. He teaches a variety of Networking, IT Security, and Server Administration classes.

He also performs on-site network consulting approximately half of his billable time. His current long-term engagement is with Timken where he provides server support services and special projects which have included Active Directory Design and Security during Domain Consolidation. Additional projects have included security assessments and Penetration Testing for various clients.

Ernie also assists in the scheduling and management of classes offered at Solutient's Microsoft Training Center, as well as CEH courses taught throughout the Midwest.

For information on Ernie's Microsoft credentials and a list of classes he is approved to teach, refer to:
