## **Join Kentuckiana ISACA**

You do not have to have a [CISA certification](#) to join the local chapter. There are many benefits to membership including networking, career opportunities, resource leveraging and more. Click on the link above to view how to join.

## **Chapter Message**

Hello everyone,

Welcome to the 2004-2005 year of the Kentuckiana Chapter of ISACA. We're looking forward to seeing you at the September 28<sup>th</sup> meeting.

Our first meeting will be an important one for you to attend to make your voice heard in Chapter elections. The slate of candidates is noted below. The meeting will begin with introductions of candidates and a voice vote. If you are interested in sharing your talents by participating in Chapter organization in any capacity, please notify Debbie Shelton (502) 627-4614 or [debbie.shelton@lgeenergy.com](mailto:debbie.shelton@lgeenergy.com) There are many opportunities for you to get involved.

Members of the proposed Board met several times over the summer to begin coordinating the Chapter for a successful year. Regular meetings have been scheduled for the fourth Tuesday of each month at Vincenzo's 11:30-1:30. Due to the holidays, however, in November and December we will be teaming up with the Kentuckiana Chapter of the IIA on the second Tuesday at the Bristol Downtown. This is a great way for us to network and share ideas.

We will be letting you know of events planned for the remainder of the year. As they are communicated, please add them to your calendar and check our [website](#) regularly for new chapter information. Also, we encourage you to submit any ideas or wishes you have for particular programs during the next year.

We are constantly looking for new members. Please refer prospects to one of our Board members so we can get them on the mailing list.

We look forward to seeing you on the 28<sup>th</sup>!

### Volunteer Opportunity

NOTICE: The Chapter has an opportunity to receive Financial assistance for Chapter promotion through ISACA Headquarters' 2005 Marketing Assistance Program. We must submit a marketing plan by November 15, 2004 to be eligible. In order to do this however, we need a volunteer to take on the task of putting the plan together. If you are interested in serving the Chapter in this way, please notify KY Chapter President, Debbie Shelton at (502)-627-4614 or [debbie.shelton@lgeenergy.com](mailto:debbie.shelton@lgeenergy.com)). Without a volunteer, however, the Chapter will be responsible for fully funding all of our promotional initiatives for Chapter meetings, seminars, and CISA review courses. Thank you.

### **Job Opportunity Highlights**

#### Humana

Humana is looking for an IT Audit Consultant with a bachelor's degree in related field (I/T, Finance, Accounting, etc.), MBA preferred. Completion of CPA, PMP, CIA, or CISSP, CISM, or CISA highly desired. Minimum three years auditing and two years IT Audit. Humana will consider candidates with less auditing experience who have broad technical expertise. Broad IT experience supplemented with expert knowledge of multiple environments.

For more opportunities, please visit the Kentuckiana Chapter Career Opportunities website, [here](#).

### Perimeter Security: Keith Fowler (09/28 - Topic/Speaker)

Keith Fowler has been Manager of IT Security for LG&E Energy for approximately four years. Previously he held positions in the IT Operations area, including Manager of IT Production, and technical support roles in the networking and distributed systems support areas. Prior to joining the Information Technology department, Keith spent 15 years in the Power Generation Engineering and Administration area of LG&E, where he provided development and support for distributed control systems and developed compliance monitoring tools for the environmental and production support areas.

Keith has extensive experience in networking, operating systems, and security. He has in-depth knowledge of intrusion detection and prevention; hacker techniques and exploits; system forensics and investigations; and auditing networks, perimeters, and firewalls.

Protecting your company's network perimeter has never been a bigger challenge. In fact, some would argue that the concept of the perimeter itself is obsolete. Prior to five or so years ago, the boundary of most enterprise networks was well defined and usually could be drawn at the border connection to the outside world. Today, with the preponderance of B2B connections, mobile clients, remote access, customer access to applications (B2C), and multiple security zones, coupled with many threat vectors, the perimeter is complex and difficult to get our arms around. This session will focus on the evolution of the perimeter, basic architectural suggestions for ensuring protection of our networks, firewall auditing techniques, and other security best-practices.

Please join us for this meeting. Logistics for this meeting are on Page 1.

## *Kentuckiana Chapter Officers\*\**

Chapter Position	Name of Officer
President	<a href="#">Debbie Shelton</a>
Vice President and Web Master	<a href="#">Bruce Edwards</a>
